

## ANTI-SUSPENSION TRAUMA DEVICE

The anti-suspension trauma device is composed of two bags which contain two safety straps are joined together. Safety straps allow the suspended worker to stand up in the harness to relieve the pressure being applied to the arteries and veins around the top of the legs.

- 1.- Its compact and lightweight design makes no discomfort to the worker during the performance of their work.
- 2.- Can be attached to the complete range of Climax full body harnesses.
- 3.- Adjustable safety straps. Max. Length:130 cm.
- 4.- Flexing leg muscles and releasing harness leg strap pressure stimulates blood flow and helps prevent onset of suspension trauma.
